

How do you talk to your cat & dog about the birds and the bees?

Unwanted pregnancies. Disease. Fights. Straying from home. As a responsible owner, it's up to you to protect your pets. Animal shelters are not the solution. Overcrowded & underfunded, they are filled with abandoned pets who need good homes. Every new litter adds to the problem by producing more unwanted animals and taking potential homes from those who are already in dire need of love & care.

Fix the problem. Spay & neuter your pets. Go to fixtheproblem.ca for the real facts of life.
